

### Science at Allerton C of E Primary School

At ACE we use the pupil's natural curiosity to ask questions, investigate and demonstrate the attitudes of scientific working. We celebrate and enjoy Science both in school, in partnership with others and on trips and visits further afield.

Year 5 have used the laboratories at Allerton High School for exciting practical Science, selected pupils attended the Great Science Share to show case our learning to other Leeds schools and a group of children visited the Big Bang Science exhibition at Doncaster Racecourse. We have also worked with students from Leeds University to learn about food, and observed planets in the Astro-dome visiting Allerton High School. Other local facilities have been well utilised, such as Harlow Carr Gardens and our own brilliant outdoor space.
