

# Why have the vegetables turned black?

When we looked inside the children were amazed Ahmed "It is still orange!" When we looked closer we could see that it was starting to go black inside. Sara noticed something "It doesn't smell very nice." Olivia "That's because it is going mouldy."

The children came into school and noticed that some of our vegetables had started to turn black. **What's happened?** Ahmed "It's dirty we need to wash it."

Olivia-Mae "It's going mouldy." **What does that mean?**

Olivia-Mae "It is when it gets too old."

We decided to explore what was happening. First the children wanted to wash the veg.

Ahmed "It's not coming off"

We then looked at how hard it was. Sara "It is really soft." We compared it to a carrot that was still orange. Suriyah "This one is still hard." We decided to look inside. Ahmed "It is going to be all black inside."
