

Metal Investigation

The boys have enjoyed playing with the metal detectors this week. They have been exploring which objects in the classroom make it beep.

TE "Have you found something that makes it beep?"

Isaac "The dinosaurs don't make it beep."

Valerio "Lets look over here."

The boys made the metal detector beep.

TE "what made it beep?"

Isaac "The apron hanger."

TE "Why do you think that made it beep?"

Valerio "because it's metal, It's hard and cold."

TE "What else could be metal in the room?"

Isaac "The playdough toys."

TE "why do you think that?"

Isaac "because they are hard."

The boys found out that the playdough toys did not make the detector beep.

Isaac "the legs of the table are metal instead."

The boys carried on finding things in the room and started to note down what they had found.

We talked about the properties of all of the objects they were finding.
